Manish Dixit,  
Inheritchain,  
90 Matheson Blvd  
W. Mississauga L5R 3R3 ON CA

Dear Mr. Dixit,

I am writing to apply for an internship position at Interchain. I believe it would be an opportunity where I would be able to excel, given over **3 years of experience** of working with startups and building products from the ground up. I would be able to bring my experience of Project Management, Mobile application development, Data analysis and full stack development which I believe would be very well utilised at Interchain.

At my current role, I am working part time at as a Technical lead for one project and developer at the other project. My roles and responsibilities at the startup are:

- **Full stack developer** using **MEVN stack** to build a zero-code CRM Platform
- Consulting with clients
- Managing a team
- **Network Engineering** and Server Management
- **Swift Development** (iOS Platform **Mobile**)

Additionally I believe my past work with a multinational eCommerce company Tata CliQ and startups would help me to be able to meet the challenges I face during the course of my internship at Inheritchain. I have been responsible for end to end development of software products with over 100,000 downloads.

Thanking you for considering my candidacy for this position. I hope to hear back from you.

Sincerely,  
Yatish Dipankar Gautam
